COMMISSIONER FOR PATENTS AND TRADEMARKS
BOX NON-FEE AMENDMENTS
WASHINGTON, D.C. 20231

SIR:

Responsive to office action dated July 8, 2002. Please
amend as follows:

In the specification

Please substitute newly submitted page 6 of the
specification for that presently on file.

Page 8, rewrite the second paragraph to read as follows:

--Turning now to Figure 4, a first end edge 22B locates
a C-shaped reinforcing member 40 including axially oriented
portions 41 and 42 and a transversely extending member 43, all of
which are adhered to the end of the seal outwardly of the area of
commencement of tearing, wherein the above-mentioned crumpling as
the seal is unintentionally torn from its engagement surrounding
the mouth of the toner occurs. A similar C-shaped member 44 is
positioned at the opposite edge 23A including axially oriented
portions 45 and 46 which are adhered to the seal, and a
transversely extending portion 47 which is not adhered to provide
a guide for the tear strip prior to and during the time it is
pulled.--

[Handwritten marks: a large 'X' at the top, a signature, and a large '#' symbol with a wavy line below it.]
